

Wyatt Becker

PENETRATION TESTER & SECURITY CONSULTANT

Wyatt.becker@gmail.com | (727) 899-1871 | linkedin.com/in/wyattbecker

SUMMARY

OSCP-certified penetration tester with 7+ years of experience and 500+ completed engagements across government agencies, financial institutions, and casinos. Full engagement lifecycle expertise—from client consultation and hands-on testing to detailed reporting and remediation guidance. Proven track record securing mission-critical infrastructure including voting systems and federal agency environments. Currently providing independent mobile application security assessments and building custom security tooling.

EXPERIENCE

Independent Security Consultant

2025 — Present

Freelance

- ▶ Deliver expert mobile application security assessments for clients requiring thorough, actionable vulnerability analysis
- ▶ Built RedOps Mobile, a custom penetration testing application that streamlines mobile security assessment workflows
- ▶ Active bug bounty hunter with multiple critical vulnerability discoveries across web and mobile platforms

Cybersecurity Consultant

2018 — 2025

Bulletproof Solutions

- ▶ Conducted 500+ penetration testing engagements independently across web application, internal network, external infrastructure, and mobile platforms for high-stakes clients
- ▶ Managed full engagement lifecycle: direct client consultation, hands-on testing, detailed report writing, and vulnerability remediation guidance
- ▶ Secured voting machine systems ahead of the 2020 election, identifying critical vulnerabilities that threatened election integrity
- ▶ Conducted authorized physical security assessments, demonstrating unauthorized access vectors and delivering actionable hardening recommendations
- ▶ Core member of the 5-person team that secured certifications and accreditations for Bulletproof Solutions to conduct federal agency penetration testing

KEY HIGHLIGHTS

- ▶ 500+ security engagements across 4 industry verticals
- ▶ Secured 2020 election voting machine infrastructure
- ▶ Federal agency penetration testing accreditation team
- ▶ Multiple critical bug bounty vulnerability discoveries
